

Frame Hardware Color Options

DIY Retractable Awning frames, installation & support brackets and optional hoods are constructed of metal components that are professionally coated to offer products that look great while providing superior solar protection.

The SunCover SC4000 framework components have been pretreated before being powder coated. This unit is available in **White and Sand** hardware colors. This finish is warranted for 5 years.

The SunCover SC5000 framework, like the SC4000 is pretreated before the powder coating is applied. The powder coated finish is available in **White, Sand & Brown**. This durable finish is also warranted for 5 years - see actual warranty for details.
